

PC Configure™ Programming Software

KEY FEATURES & BENEFITS

- ▶ Minimize your learning curve with an intuitive graphical interface
- ▶ Configure mobile and portable radios with a single software package
- ▶ Switch between radio and system parameters, and program zone and channel properties with the click of a mouse
- ▶ Program your radios in analog conventional, Multi-Net®, Project 25 conventional and trunking, and SMARTNET®/SmartZone®
- ▶ Use one template to program multiple radios – simply change unit IDs and download the file to each radio

Computer Requirements:

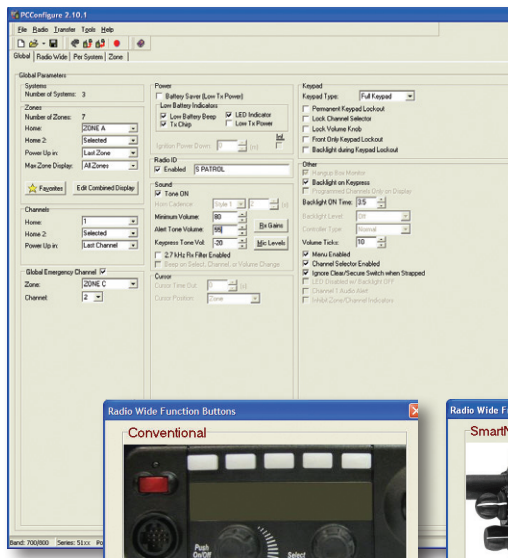

- 800 MHz Pentium or greater
- 128 MB RAM
- 40 MB hard disk space
- CD-ROM drive

The portability of the software lets you program your radios anywhere.

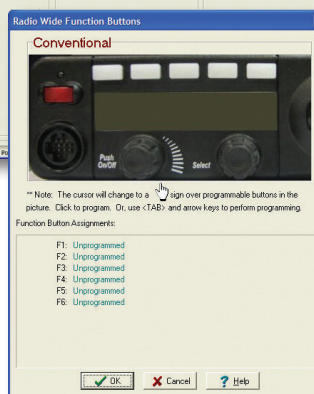

EFJohnson's PC Configure™ software is the most user-friendly programming software for public safety and service radio users. Program all of your EFJohnson mobile and portable radios quickly and easily with the same software package. With minimal setup time or training, PC Configure gives you the flexibility to program your EFJohnson portable or mobile radios for any encryption or system type installed on the radio. PC Configure is a Windows®-based application. With its intuitive and unique graphical display, PC Configure allows you to re-reflash radios much faster than any other radio programming software. PC Configure's "remember" function stores previously programmed parameters (such as software version or options) and recalls them for future use.

Manage encryption keys, channels, zones, and other vital radio functions - all from your PC.

Simplify radio programming with a click of a mouse.
